

HONEYWELL ELSTER GAS CHROMATOGRAPH ENCAL 3000 SERIES

During production and distribution of natural gas it is of high importance to determine its composition and calorific value because natural gas is bought and sold on its energy content. A gas chromatograph (GC) is used for the analysis of gas and calculations of its heating value, GC is an analytical instrument that measures the content of various component in a sample. The analysis performed by a gas chromatograph is called gas chromatography.

		
EnCal 3000 V2 The Honeywell Elster® EnCal 3000 is a gas chromatograph specially designed for natural gas energy measurements. This state-of-the-art analyzer uses chromatography components based on the latest micro electro-mechanical systems (MEMS) and capillary column technique. This results in highly repeatable and accurate analysis results	EnCal 3000 Pro-chain The Honeywell Elster® EnCal 3000 Prochain is a gas chromatograph specially designed for natural gas energy measurements. This state-of-the-art analyzer uses chromatography components based on the latest micro electro-mechanical systems (MEMS) and capillary column technique. This results in highly repeatable and accurate analysis results	GasLab Q2 The GasLab Q2 ensures a fast online natural gas analysis with ISO/GPA/ASTM calculations. It has a small footprint and requires no carrier gas. It fulfills accuracy Class A according to OIML R140
Accuracy / repeatability Repeatability <0.005% @ steady temperature Speed Analysis time: 3 min. for C6+ analysis, 5 min. for C9+ analysis Carrier gas usage •<8 cc/minute •1 x 50 liter bottle will last 2 years Stream select for 5 streams High end solution and to be proposed when requirement is like C9 or C12, BIO GAS, H2S, NTS etc	Accuracy / repeatability Repeatability < 0.025 % @ steady temperature. Speed Analysis time: 4 min. for C6+ analysis Very economic against ABB, Emerson for requirement upto C6+	Uncertainty Hs, Ws, ρ: ≤0.5%, xCO2: ≤0.2mol% Repeatability Hs, Ws, ρ: ≤0.1%, xCO2: ≤0.1mol% Economic solution for Methane measurement
